

Sprint 3 Report

Datum

11/18/24

Actions to Stop Doing:

We need to stop adding unnecessary files to our github.

Actions to Start Doing:

We need to commit code a bit more often. If this means more branches then so be it. But just having more iterations on Github to aid development is something we will start doing. We will also start testing more, as we do that but it may not be enough.

Actions to Keep Doing:

We have done a good job at dividing tasks and ensuring everyone has something to do. We will keep communicating well and working hard on our tasks.

Work Completed/Not Completed:

We completed everything in our plan except for complete styling of all the pages. There are a few department pages that still need to be finished styling.

Work Completion Rate:

Specific User Stories Completed -

Completed:

- As a company employee, I want to edit my basic account information
- As an employee I want to get a quick overview of the files in my department
- As an employee, I want to be able to quickly share documents to other departments to view

Partially completed:

- As an employee, I want to access my company's knowledge base through the web
- (92% completed)

Days in the Sprint:	14
User Stories Per day:	0.35
Story Points Completed:	35
Hours/Day:	4.26
