# Sprint 4 Plan

## Datum

12/03/24

## Goal:

In this sprint we want to finish the remaining styling of the webpages, create a functional chatbot, and ensure all bugs are fixed and the project is ready to be launched.

## Task Listing:

- As an employee, I want to be able to access the knowledge base from the web. This will allow me to view the company's files from home or work or anywhere in the world. {21}
    - Finish styling the web pages based on our designs.
    - Implement the recommended styling changes.
    - Implement the recommended feature additions and changes
    - Write tests for each web page and component.
    - Ensure bugs are not present in the code.
- As an employee, I want to access relevant information and clarify my understanding about certain documents in the knowledge base.  {13}
    - Ensure chatbot can only see files you have access to
    - Implement the existing RAG into the aiButton chatbot
- As an administrator, I want to have management access to all files in the database, in order to manage files created by multiple employees in my team. {5}
    - Prevent non-administrators from accessing other file pages.
    - Prevent non-administrators from sharing and deleting files they do not own.

## Team Roles:

Justin: Product Owner/ Developer
Nick: Developer
Lipitha: Developer
Milo: Developer
Ryan: Developer
Peter: Scrum Master/Developer

## Initial Task Assignment:
